Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claims 1-20 (Canceled)

21. (New) A shoe comprising:

a shell;

a sole assembly; and,

a heel protector permanently secured to the shell, wherein the heel protector includes;

a semi-rigid middle portion, wherein the middle portion substantially covers a rear heel portion of the shell and is permanently attached to the shoe;

a first side portion integrally formed with the middle portion, wherein the first side portion partially covers a first side of the shell; and

a second side portion integrally formed with the middle portion, wherein the second side portion partially covers a second side of the shell.

22. (New) The shoe of claim 21, wherein the first side portion further comprises a first aperture and the second side portion further comprises a second aperture, wherein the first aperture aligns with a first eyelet on a front of the shell and the second aperture aligns with a second eyelet on the front of the shell.

Applicant: Michael John O'Connor

SN: 10/749,449

23. (New) The shoe of claim 22 wherein a shoelace is laced through the first aperture and the first eyelet, and the second aperture and the second eyelet.
24. (New) The shoe of claim 21 wherein the middle portion includes at least one horizontal ridge integrally formed in the middle portion.
25. (New) The shoe of claim 21 further comprising a bottom edge, wherein the bottom edge of the protector is secured to a welt in the shoe.
26. (New) The shoe of claim 25 wherein the bottom edge of the protector is stitched to the welt.
27. (New) The shoe of claim 25 wherein the bottom edge of the protector is adhesively bonded to the welt.
28. (New) A shoe comprising:
a heel protector including;
a semi-rigid middle portion, wherein the middle portion substantially covers a rear heel portion of a shell and is permanently attached to the shell along a bottom edge of the middle portion;
a first side portion integrally formed with the middle portion having at least one aperture formed therein, wherein the first side portion partially covers a first side of the shell;
a second side portion integrally formed with the middle portion having at least one aperture formed therein, wherein the second side portion partially covers a second side of the shell; and

SN: 10/749,449

wherein the at least one aperture formed in the first side portion and the at least one aperture formed in the second side portion each align with a corresponding eyelet on a front of the shell.

29. (New) The shoe of claim 28 wherein a shoelace is laced through the at least one aperture formed in the first side portion and the corresponding eyelet, and the at least one aperture formed in the second side portion and the corresponding eyelet.

30. (New) The shoe of claim 28 wherein the middle portion includes at least one horizontal ridge integrally formed in the middle portion.

31. (New) The shoe of claim 28 wherein the bottom edge is secured to a welt in the shoe.

32. (New) The shoe of claim 31 wherein the bottom edge of the protector is stitched to the welt.

33. (New) The shoe of claim 31 wherein the bottom edge of the protector is adhesively bonded to the welt.

34. (New) A shoe comprising:
a shell;
a sole assembly; and,
a heel protector including;

Applicant: Michael John O'Connor

SN: 10/749,449

a semi-rigid middle portion, wherein the middle portion substantially covers rear heel portion of the shell; and a bottom edge of the middle portion is secured to a welt between the shell and sole;

a first side portion integrally formed with the middle portion, wherein the first side portion partially covers a first side of the shell;

a second side portion integrally formed with the middle portion, wherein the second side portion partially covers a second side of the shell.
